

The European Practice Assessment (EPA) - National Perspectives:

**Germany
Switzerland
Slovenia
Belgium
France**

Joachim Szecsenyi (D)

Beat Künzi (CH)

Vlasta Vodopivec-Jamsek (SLO)

Nicole Boffin (B)

Marianne Samuelson (F)

Situation in Germany

- 90% of population in statutory health care
- Free access to specialist or GP in ambulatory care
- patients pay € 10 for first quarterly contact
- new (optional) contracts: patients save € 10 and/or medication co-payment, if GP is first choice

- 2004: Quality management mandatory for all ambulatory and hospital care
- Federal Committee (GEMBA) will set basic rules

Practice management/ quality management (QM)

- Established QM systems developed for industry or service organisations focus on documents, flow-charts etc.
- Extra workload, high costs
- No or little evidence on change of performance or on care delivered
- QM is mostly seen independently from continuous professional development

How to improve quality on a practice level?

➤ Assessment and feedback

- Validated Indicators (*Engels et al. Family Practice 2005, in press*)
- Learn from comparable „best practices“
- Learn from variation
- Multi-perspective (patients, doctor, team, etc.)
- individualised and needs oriented
 - Written feedback alone is mostly ineffective (*Cochr Database Syst Rev 2002*)

➤ Framework and personal support

- Quality circles (*Wensing, Szecsenyi et al. J Eval Clin Pract 2004*)
- Educational outreach visits/visitors (*v d Homberg et al. QSHC 1999*)

➤ Multifaceted interventions are more effective

- (*Grol, Grimshaw: Lancet 2003*)

The focus of EPA in Germany

- Focus on internal quality management and improvement
 - individual, needs oriented feedback and benchmarking
 - visitor as auditor and educational facilitator
 - software for immediate feedback in team session
- Focus on transparency
 - Certificate for practice which has performed EPA successfully
 - Transparent criteria and procedures
 - STIFTUNG PRAXISTEST e.V.: Independent from payers and providers

EPA domains

Elements and processes of EPA

1. Selfassessment
2. Patient survey
3. Team questionnaire
4. Practice visit by trained visitor:
 - Check of premises and equipment
 - Interview with main GP
 - Team session with feedback (online) - strengths and weaknesses
5. Paper-based feedback to practices
6. Problem and needs oriented continuous quality improvement activities
7. Certificate - when criteria are met

Patient survey (EUROPEP)

Practice visit: Check of premises and equipment

Refrigerator for
vaccines

Practice visit: Check of premises and equipment

Check of information leaflets for patients

Practice visit: Check of premises and equipment

Check of doctor`s bag

Practice visit: Interview with main GP

Practice visit: Team session with feedback

Welcome page

This internet page serves as platform for the online-benchmarking and for the online data input for practices which participate at the program European Practices Assessment (EPA).

As practice or visitor within the framework of the project you get access to the software with your passwords.

In the case that you are not participate at this program but you are interested you get further details under the following addresses:

- to the implementation of EPA in Germany and registration for the project:
www.aqua-institut.de
- to the international EPA development group:
www.topas-europe.org
- to the certificate of the association Praxistest:
www.praxistest.de

- Benchmarking against other practices

EPA / QM and Certification

Certificate

Practices

Certificate – Germany

- PRAXISTEST- a non-profit foundation, founded by EPA developers and the Bertelsmann-Foundation
- Independent from institution which does the assessment
- Independent from professional bodies

- Complete EPA process
- Fullfillment of defined criteria

Zertifikat

Hiermit wird bestätigt, dass die Praxis

Max Mustermann

in 99999 Musterhausen

ein Qualitätsmanagement-System gemäß den Kriterien von Stiftung Praxistest e. V. erfolgreich eingeführt hat.

Stiftung Praxistest e. V. bestätigt:

die erfolgreiche Teilnahme am Qualitätsmanagement-System „Europäisches Praxisassessment“ mit den Elementen Selbstbewertung der Praxis, Patientenbefragung, Mitarbeiterbefragung, Begehung eines externen Visitors, Fremdbewertung und Teambesprechung sowie die vollständige Erfüllung von Kernanforderungen in den Bereichen Sicherheit und Infrastruktur.

Gültigkeitsdauer: April 2007

Registrier-Nr.: 99999999

Datum der Ausstellung: XX. April 2004

Dr. med. Thomas Ruprecht

Dr. Brigitte Mohn, MBA

Stiftung Praxistest e. V.
Carl-Bertelsmann-Straße 256 · 33311 Gütersloh
Internet: www.praxistest.de · e-mail: info@praxistest.de

Stiftung Praxistest e. V. fördert Qualität und Transparenz im Gesundheitswesen und ist unabhängig von Verbänden, Kostenträgern, Körperschaften und Industrie.

Where are we now?

- > 100 practices through EPA process, certified
- increasing number in process
- very positive evaluation of GPs and teams
- numerous quality improvement activities in individual practices

- growing public awareness of Stiftung PRAXISTEST and the EPA certificate

Next steps

- **Dissemination of EPA in all regions in Germany**
- **Practice networks**

- **EPA for dentists (collaborative project with Academy for Dental Education, Karlsruhe)**
 - **Revision of EPA instruments, new indicators**
 - **Pilot study in Germany started, international working group established.**
- **EPA for specialists under development**

Quality management

„Quality management is a systematic way to ensure that activities are performed as they were planned It is about preventing problems from the very beginning by establishing **attitudes** and **methods** which make prevention of problems possible“

(Crosby 1979)

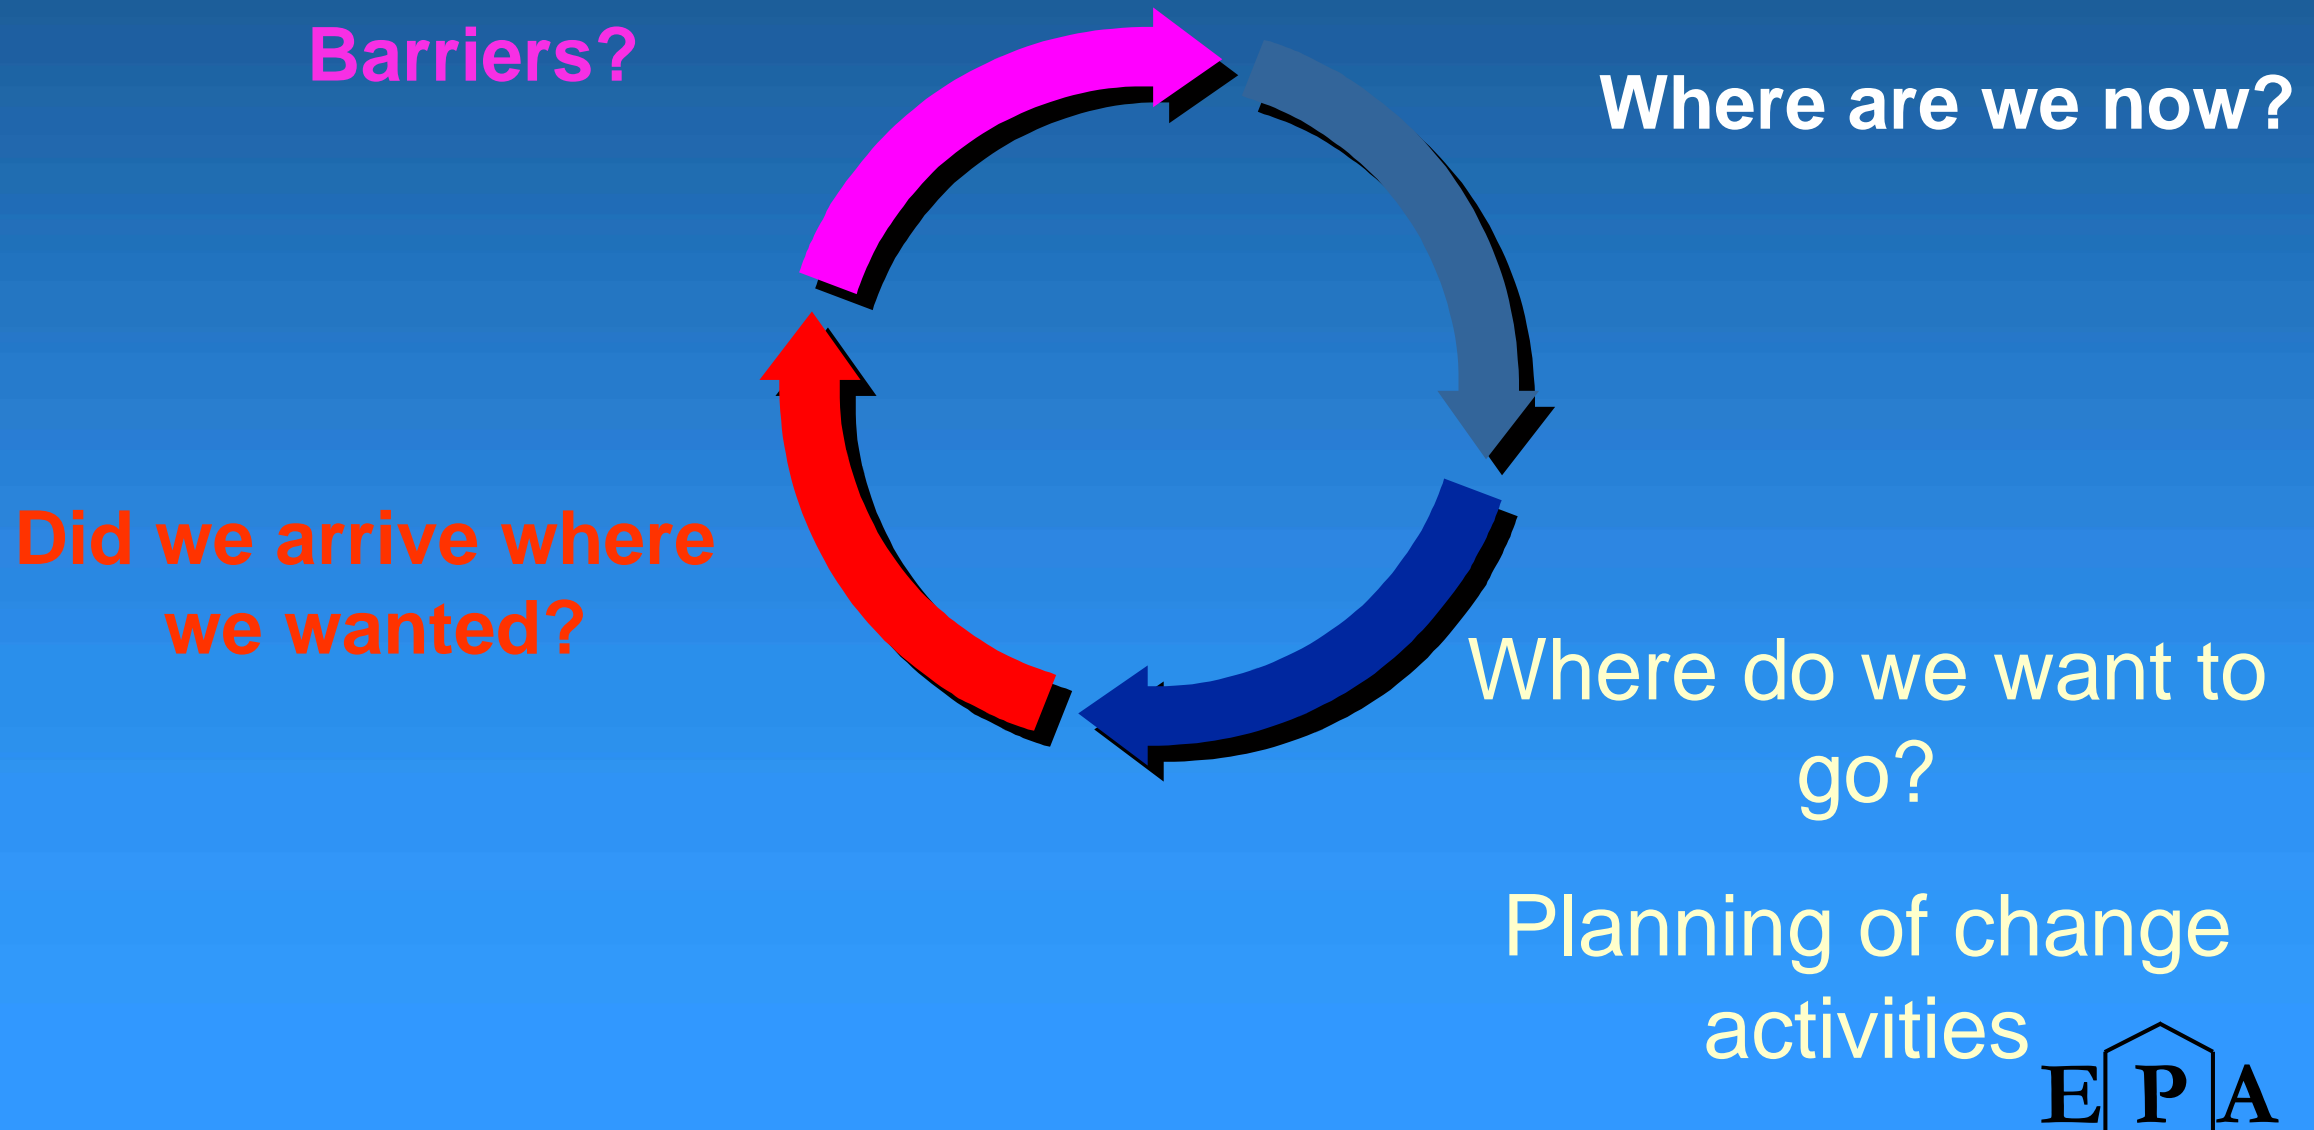

Measurement and management

- „If you can't measure it, you can't change it“

(D. Berwick)

- „If you don't want to change it,
don't measure it“

Basic model - the quality cycle
